Yakutsk is in Russia. There are four seasons in this city. They are winter, spring, summer and autumn. The winter runs from December to February. The average temperature is colder than the freezer. It is about -42°C . [SEP] The spring runs from March to May. The average temperature is about -21°C .

The summer runs from June to August. It is warm. The average temperature is about $+20^{\circ}\text{C}$. And the autumn, it runs from September to November. The average temperature is the same as the spring. [SEP]

Life is very difficult in the winter. At -42°C , students cannot go to school. They have to stay at homes. In the spring and autumn, people have some activities outside. They go skiing and ice-skating. And they have picnics in the forests in the summer.
